

MARCH 24.

EDWIN G. CONKLIN, Ph.D., Vice-President, in the Chair.

Nineteen persons present.

A paper entitled "Life Colors of *Puccinia limantouri* and Description of a new *Heros* from Mexico," by Henry W. Fowler, was presented for publication.

The following minute on the death of Lewis Woolman was unanimously adopted:

The Academy of Natural Sciences of Philadelphia desires to place on record its appreciation of the loss it has sustained in the death of LEWIS WOOLMAN, who, since his election to membership in 1884, has manifested a constant interest in the well-being of the society. His work in connection with the geology of New Jersey and eastern Pennsylvania, especially as illustrated by the boring of artesian wells, formed a valuable addition to knowledge. He was thorough and accurate in his methods, while his intercourse with his fellow-members was characterized by a hearty cheerfulness and sincerity. He was active in promoting the interests of the Biological as well as those of the Mineralogical and Geological Section, and during the latter months of his life he rendered service to the Academy as a member of the Committee on Accounts. His memory will be held in grateful recollection.
